

LUCAS REINOSO URABAYEN

Advanced Industrial Engineering Student | Operations | Continuous Improvement | Data Analysis

Mendoza, Argentina +54 261 661 1039 Ireinosourabayen@gmail.com linkedin.com/in/lucas-reinoso-057987300
lucasreinoso5.github.io/portfolio-lucas

PROFILE

Advanced Industrial Engineering student with international academic experience in Argentina and France. Project experience spanning operations, continuous improvement, process design, business planning, and end-to-end data science. Combines structured problem-solving with Python, Power BI, and Excel. Available for a full-time internship.

EDUCATION

École Nationale d'Ingénieurs de Tarbes (ENIT) — Tarbes, France

2025 — Present

Industrial Engineering studies — Master's level

- First year completed; currently progressing toward the final full-time professional internship.
- University coursework completed entirely in French.

Universidad Nacional de Cuyo (UNCuyo) — Mendoza, Argentina

2021 — 2025

Industrial Engineering

- Completed four years before continuing my academic studies at ENIT in France.

SELECTED PROJECTS

AirTS-Forecast — Air Pollution Forecasting

Feb. 2026 — Jun. 2026

ENIT two-person supervised engineering project | Time Series & Deep Learning

- Collaborative development of an end-to-end forecasting framework using five years of pollution and meteorological data from Toulouse.
- Comparison of ARIMA, SARIMA, and Holt-Winters with RNN, LSTM, Bi-LSTM, GRU, and hybrid architectures.
- Hyperparameter optimization with Optuna and evaluation of univariate and multivariate models using MAPE, RMSE, MAE, and R^2 .

ProMind — Knowledge Workflow & Functional Web Application

2026

ENIT individual Industrial Engineering project | Process Design & AI-Assisted Development

- Modeling of the complete knowledge-request lifecycle, including roles, business rules, prioritization, K-Sprints, and validation.
- Iterative development and refinement of an AI-assisted functional web application implementing the designed role-based workflow.

Green Drop — Post-Fire Reforestation Business Plan

2025

ENIT six-person entrepreneurship project | Business & Operations Planning

- Collaborative development of a business and operating model for a biodegradable seed-sphere reforestation concept.
- Primary responsibility for market analysis, segmentation, pricing, distribution, and marketing strategy, with contributions to operational and financial planning.

TECHNICAL SKILLS

Engineering & improvement: Lean Management, Six Sigma, PDCA, 8D, Ishikawa, RCA, process modeling, structured problem-solving.

Production & operations: MRP, inventory management, production planning and control, workflow design, resource allocation.

Data & BI: Python, Pandas, PyTorch, Scikit-learn, Optuna, Power BI, EDA, visualization, machine learning, time series.

Project & business management: Project planning and scheduling, Gantt charts, PERT/CPM, critical path analysis, resource allocation, risk and progress monitoring; market, cost and profitability analysis.

Tools: Microsoft Excel, Power BI, MATLAB, Simulink, Visual Studio Code, Jupyter, Git/GitHub, ProWhy.

CERTIFICATIONS & ADDITIONAL TRAINING

IBM: Data Analysis with Python | **Data Science:** Python, data analysis, and machine learning (in progress) | **Microsoft Excel:** Additional training

LANGUAGES

Spanish: Native | **French:** Professional working proficiency | **English:** B2 — TOEIC 855/990
