

LUCAS REINOSO URABAYEN

Final-year Master's Student in Industrial Engineering | Operations | Continuous Improvement | Data Analytics

Mendoza, Argentina | +54 261 661 1039 | lreinosourabayen@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFILE

Final-year Master's student in Industrial Engineering with international academic experience in Argentina and France and hands-on project experience in operations, continuous improvement, process design, business planning and data analytics. I combine structured problem-solving with Python, Power BI and Excel. Available for a full-time professional internship starting in late January 2027.

RELEVANT PROJECTS

AirTS-Forecast - Air Pollution Forecasting | ENIT | Feb. 2026 - Jun. 2026

- Built, in a 2-person team, an end-to-end forecasting system using 5 years of Toulouse air-quality and weather data, covering data preparation, modeling and evaluation.
- Benchmarked ARIMA, SARIMA and Holt-Winters against RNN, LSTM, Bi-LSTM, GRU and hybrid architectures; tuned hyperparameters with Optuna and evaluated models with MAPE, RMSE, MAE and R^2 .

ProMind - Process Design & Functional Web Application | ENIT | 2026

- Individually designed an end-to-end knowledge-request workflow, defining roles, business rules, prioritization, K-Sprints and validation steps.
- Translated the process design into a functional web application and iteratively refined it through AI-assisted development to validate the proposed workflow.

Green Drop - Business & Operations Planning | ENIT | 2025

- Co-developed, in a 6-person team, a business and operating model for a post-wildfire reforestation concept using biodegradable seed spheres.
- Led market analysis and segmentation, pricing, distribution and marketing; also contributed to operational and financial planning, cost and profitability analysis.

TECHNICAL SKILLS

Continuous improvement & processes: Lean Management, Lean Manufacturing, Six Sigma, Kaizen, 5S, DMAIC, PDCA, 8D, Ishikawa, RCA, Process Mapping and Process Modeling.

Operations & production: MRP, ERP, Inventory Management, Production Planning & Control, Capacity Planning, Resource Allocation and Flow Design.

Data & BI: Python, Pandas, SQL (basic), Power BI, Excel, EDA, Data Visualization, Machine Learning, Time Series Forecasting and KPI Analysis.

Project management: Gantt, PERT/CPM, Critical Path Analysis, Project Planning & Scheduling, Risk Management and Resource Allocation.

Tools: MATLAB, Simulink, Visual Studio Code, Git/GitHub, PyTorch, Scikit-learn, Optuna and ProWhy.

EDUCATION

École Nationale d'Ingénieurs de Tarbes (ENIT) - Tarbes, France | 2025 - Present

Industrial Engineering - Master's level | First year completed; university coursework completed entirely in French.

Universidad Nacional de Cuyo (UNCuyo) - Mendoza, Argentina | 2021 - 2025

Industrial Engineering | Completed four years before continuing academic training at ENIT in France.

CERTIFICATIONS & LANGUAGES

Certifications: IBM Data Analysis with Python | IBM Data Science: Python, Data Analysis & Machine Learning (in progress) | Microsoft Excel: supplementary training.

Languages: Spanish: Native | French: Professional working proficiency | English: B2 - TOEIC 855/990.
